

Trustmark/Starmark Formulary Drug List

April 2008

Introduction

Trustmark and Starmark are pleased to provide the Trustmark/Starmark Formulary Drug List as a useful reference tool to assist you and your provider in selecting clinically appropriate and cost-effective drugs.

The Trustmark/Starmark Formulary Drug List is organized by therapeutic class (e.g., cardiovascular) and further divided by subclasses of drugs that work similarly in the body (e.g., hypotensives, vasodilators). Unless exceptions are noted, applicable dosage forms and strengths of the drugs listed are included in the formulary.

If you use a PC, you may search for a specific drug by holding down your CTRL and F keys and entering the name of the drug. If you use a Mac, hold down your Command and F keys, and enter the name of the drug.

Lowering Out-of-Pocket Costs with the Three-Tiered Format

To keep your out-of-pocket costs as low as possible, consider the following: generic drugs are typically available at the lowest cost, preferred brand-name drugs will generally cost more than generics, and nonpreferred brand-name drugs will generally cost the most and may require a prior authorization.

The tiered format places drugs into tiers or levels of cost-sharing as follows:

Tier 1 (Generic): Lowest copay. This includes generic drugs on the formulary as well as those not considered formulary products.

Tier 2 (Preferred Brand): Intermediate copay; branded products selected for Tier 2.

Tier 3 (Nonpreferred Brand): Branded products not selected for Tier 2, as well as all nonformulary branded products. Drugs in this category may be subject to prior authorization. In most cases, there will be reasonable alternatives in Tier 1 or Tier 2 for products found on this highest tier.

Administration and Formulary Information

WellPoint NextRx administers the pharmacy benefit for Trustmark and Starmark. The Trustmark/Starmark Formulary Drug List is reflective of current clinical guidelines as of the date of review.

Your pharmacy benefit may impose restrictions or not reimburse some drugs and/or supplies. Over-the-counter (OTC) products, with the possible exception of insulin and diabetes monitoring products, are usually not included in the pharmacy benefit and may not be listed in this document. This document does not guarantee coverage of any drug or supply; refer to your Policy / Certificate of Insurance for specific details relating to inclusions and exclusions under your pharmacy benefit.

The information contained in this formulary is provided purely for informational purposes. Trustmark and Starmark do not warrant or ensure accuracy of such information, nor is it intended to be comprehensive in nature. This formulary is not intended to be a substitute for the

knowledge, expertise, skill and judgment of your medical provider in his or her choice of prescription drugs. The final prescribing choice remains between you and your provider.

Pharmacy & Therapeutics (P&T) Committee

The WellPoint NextRx National P&T committee consists of two interdependent subcommittees: the Clinical Review Committee (CRC) and the Value Assessment Committee (VAC). These committees work together in the decision-making process to ensure a check and a balance to one another. They meet quarterly to review, add and delete drugs from the formulary, and to establish therapy guidelines and drug utilization policies and practices.

The CRC consists of clinical pharmacists, practicing physicians, medical directors and quality assurance nurses. These professionals access a rigorous review of current clinical guidelines, treatment criteria, major medical publications, professional journals and medical specialists. The second committee, the VAC, reviews the financial information (i.e., average wholesale price, rebates, ingredient cost, cost of care, copays, coinsurance), market factors and customer impact.

Together, they work to help maintain an outcomes-based formulary, which offers you access to cost-effective drugs.

Notice

When viewing this formulary via the Internet, please be advised that the formulary is updated periodically and changes may appear prior to their effective date to allow for notification.
