AND EASY SOLUTION**

**PRODUCT RATE/UNDERWRITING GUIDE**

**TRANSAMERICA®**

**NO ONE CAN PREDICT THE FUTURE,  
BUT WE CAN CERTAINLY PREPARE  
FOR IT.**

Today's clients want fast and easy options to protect their families from unexpected financial burdens, especially final expenses. Transamerica's *Final Expense Solution Portfolio* offers a guaranteed death benefit and level premium whole life insurance from \$1,000 to \$50,000 for people of varying health levels and lifestyles.

**Fast and simplified underwriting**

Help clients secure a whole life policy from a highly rated carrier with no exams or labs so their family can cover burial and other end-of-life expenses. With the electronic application, your clients have the potential for same day (dependency MRAS email notification) approval.

**Guaranteed level premiums**

Premiums remain level and never change regardless of your client's age or health. Retirees on a fixed budget have the added convenience to pay with their Social Security benefits through Social Security Direct Express®.

**Permanent lifetime protection**

Clients between the ages of 0 to 85 can expect a permanent death benefit that is guaranteed to never change regardless of their health. The Accelerated Death Benefit Rider with Nursing Home Benefit, Accidental Death Benefit Rider, and Children/Grandchildren Benefit Rider provide additional protection in one policy.

Transamerica relies upon the application and the answers to the medical questions to determine the product the proposed insured may qualify for. While the products are designed for quick issue with limited underwriting, the products are not designed or priced to accept risks that have been previously underwritten by a Transamerica insurance company and determined to be uninsurable (this includes being issued an EZ acceptance policy in our TAN line of business for any reason). When we receive an application on a proposed insured in which the proposed insured has been declined for another life product with any Transamerica insurance company, the Solutions application will be declined.

# E-APP AND AUTOMATED UNDERWRITING

## ACCURACY

- Guided application with recommended risk class based on answers to medical questions
- No guessing on insured rate class and premium, avoiding delays due to approved “other than applied”
- In Good Order upon submission

## SPEED TO ISSUE

- Fast, automated underwriting
- Reduced cycle time
- Eliminates hold-ups for illegibility, incomplete fields, changes that are not initialed/dated

## EASY AND SEAMLESS EXPERIENCE

- Available 24/7 to fit your schedule
- Potential for same-day decision assuming agent email notification
- Fast commission payments
- Improved security, all client data captured electronically
- Avoid wasted time ordering, and handling paper applications

## HOW IT WORKS — IT'S AS EASY AS 1, 2, 3

### 1. iGO e-App®

Producer completes the electronic application with client using iPipeline.

### 2. Evaluation

Application and fast data reviewed through *Express Protect Underwriting*™.

### 3. Decision

Agent receives email notification with decision.

# APPLICATION DESIGN

The cascading application will help you determine what risk class and what product may be quoted for your clients.

# ACCELERATED DEATH BENEFIT RIDERS OVERVIEW

Transamerica's Accelerate Death Benefit Rider (ADBR) provides an accelerated death benefit that is paid instead of the cash value or death benefit in an insured's policy. The ADBR can be used to help pay for medical or nursing home expenses resulting from a medical condition from an injury or illness as determined by a physician.

## ACCELERATED DEATH BENEFIT RIDER (ADBR) - FLORIDA ONLY

This rider is available when the insured can reasonably expect death within 12 months of receipt of physician's statement.

## TERMINAL ILLNESS ACCELERATED DEATH BENEFIT RIDER (TIR) - CALIFORNIA ONLY

The insured can accelerate up to 100% of the face amount, less an interest discount, less any loans, less any administrative charge, less any premiums that would be due in the next year, if death is expected within 12 months receipt of a physician's statement.

## ACCELERATED DEATH BENEFIT RIDER WITH NURSING HOME BENEFIT (NHB)<sup>1</sup>

The insured is required to be continuously confined in an eligible nursing home for 90 days and have a physician certify that he or she will continuously remain there until death.

**Please note** — Confinement to an eligible institution must be the result of:

- An accident that occurs on or after the effective date of the rider
- A specifically diagnosed illness that first manifests itself more than 30 days following the effective date of the rider

The NHB is not available if the applicant needs assistance in the activities of daily living at the time of application or two years prior to the application.

Transamerica's ADBRs require proof of the insured's qualifying event while the policy and rider are in force. This proof shall include a completed request and a physician's statement. We may request additional medical information from the physician who submits the statement.

## HOW THE BENEFIT AMOUNT IS DETERMINED

<sup>1</sup> Not available in Florida.

## CALCULATING A RATE

MODE OF PAYMENT	POLICY FEE (face amounts less than \$5,000)	POLICY FEE (face amounts \$5,000+)	MODAL FACTOR
Annual	\$60.00	\$42.00	1.00
Semi-annual	N/A	N/A	0.51
Quarterly	N/A	N/A	0.2575
EFT (monthly)	N/A	N/A	0.086

### EXAMPLE:

**Male, age 55, face amount \$15,000 (15 units), preferred nontobacco, Immediate Solution.**

1. Take the annual rate per \$1,000 (unit) from rate table **\$38.15**
2. Multiply by the number of units  $\$38.15 \times 15 = \mathbf{\$572.25}$
3. Add policy fee **\$42.00**
4. Add the sums of steps 2 and 3 for total annual cost  $\$572.25 + \$42.00 = \mathbf{\$614.25}$
5. Multiply by modal factor and round to nearest cent  $\$614.25 \times 0.086 = \mathbf{\$52.83 \text{ per month}}$

### To add optional Accidental Death Benefit Rider (ADR)

- Please note: The ADR amount must equal the corresponding policy face amount. Thus, in our example above the available rider amount would be \$15,000 (15 units).
1. Take the annual rate per unit (\$1,000) from ADR rate table on page 7 **\$2.95**
  2. Multiply by number of units  $\$2.95 \times 15 = \mathbf{\$44.25}$
  3. Multiply by modal factor and round to nearest cent  $\$44.25 \times 0.086 = \mathbf{\$3.81}$
  4. Add the monthly ADR amount to the premium calculated in step five above  $\$3.81 + \$52.83 = \mathbf{\$56.64}$

### To add the optional Children's and Grandchildren's Benefit Rider (CGR)

- For this example, we will be adding \$5,000 (5 units) of coverage for four children/grandchildren to the policy.
1. Multiply the child/grandchild rider annual rate of \$2.00 by the number of units  $\$2.00 \times 5 = \mathbf{\$10.00}$
  2. Multiply by modal factor and round to nearest cent  $\$10.00 \times 0.086 = \mathbf{\$0.86}$
  3. Multiply by the number of children/grandchildren  $\$0.86 \times 4 = \mathbf{\$3.44}$
  4. Add the modal amount for child/grandchild rider to the amount in step four above  $\$3.44 + \$56.64 = \mathbf{\$60.08 \text{ (per month)}}$
