

General Guidelines

Our goal in underwriting is to issue your LTCi business in a timely manner.

Underwriting long term care insurance requires attention to an applicant's:

- current functional and cognitive ability
- current medical conditions including medications

An important component of successful long term care sales is thorough field underwriting. Please review the following guidelines.

Eligible issue ages 18-84 based on age nearest birthday.*

We consider applicants age nearest 85, but only prior to their 85th birthday. Some state restrictions may apply.

Premium Rate Classes

SignatureCare offers three premium rate classes that you may quote: Ultra Preferred, Select Preferred and Preferred. Underwriting decisions will depend on the multiplicity and severity of the medical conditions along with other factors. The final underwriting determination will be based on the information that was reviewed for the applicant. It is critical that you quote the appropriate rate class and in the event your client qualifies for a better rate than quoted, we will contact you to determine whether to issue with a lower rate or increased benefits. MassMutual Financial Group LTCi underwriting has the full authority to issue coverage, modify coverage, or deny coverage based on both medical and non medical factors irrespective of the suggested guidelines that are outlined in the Field Underwriting Guide.

Quoting:

It is recommended to check each medical condition reported by the client in the Field Underwriting Guide and not to quote the ultra-preferred rate if two or more ultra preferred conditions are disclosed since certain conditions may represent greater risk. Since your client may be disappointed with a premium higher than you originally quoted, it is critical that you quote the appropriate rate class.

The following premium rate classes are offered:

- Ultra Preferred (85%)
- Select Preferred (100%)
- Preferred (125%)

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

The following is a list of the classifications defined and some general guidelines for determining qualification:

ULTRA PREFERRED (ALL MUST APPLY)

For very healthy non-smoking applicants.

- Non-cigarette smoker for the last 12 months (other tobacco use acceptable)
- Weight is within Ultra Preferred range on Height/Weight Chart
- Consultation with a physician in the last 24 months
- Applicants with no medical history or considered to be under treatment for a mild medical impairment
- No current treatment for a serious condition (such as heart or circulatory disorder, diabetes, rheumatoid arthritis or cancer)
- Applicants may be receiving regular treatment of a preventative nature only, for example:
 - Medication such as thyroid replacement, hormonal supplements, digestive aids, or analgesics and anti-inflammatory medications that are used on an as needed basis are acceptable.
 - High blood pressure that is kept in the normal range (140/90 to 120/80) with medication is acceptable, but cannot be in combination with other heart disorders.

SELECT PREFERRED (ONE OR MORE OF THE FOLLOWING APPLY)

For individuals that are currently being treated for minimal to moderate medical impairments or in combination but are considered to be stable and under adequate control.

- Cigarette Smoker with no other significant medical history and otherwise in good health
- Weight is within the Select Preferred range on Height/Weight Chart
- Medical history of cardiac or circulatory disorder, diabetes, rheumatoid arthritis, or cancer with excellent prognosis

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

- Under regular treatment with prescription medications listed in the Prescription Drug Guide for Conditions Not Eligible for Ultra Preferred Rates.
- No medical consultation within the last 24 months

PREFERRED (ONE OR MORE OF THE FOLLOWING APPLY)

For applicants with moderate to significant medical impairments due to health history, weight problems, smoking status or some combination of these factors but whose medical problems are well controlled and whose overall health status is stable

- Under treatment for moderate to significant chronic health condition which requires close medical supervision (such as rheumatoid arthritis, ulcerative colitis, or emphysema)
- History of a combination of moderate to significant medical impairments (such as heart and lung disease, or rheumatoid arthritis with coronary artery disease)
- Weight is within the Preferred range on Height/Weight Chart

Additional Rate Classes used for Limited Benefit Offer Only: There are two additional rate classes available and will be offered to those applicants who have a combination of medical conditions that pose a higher, but not immediate risk, of utilization of long term care services. This is done at the underwriter's discretion and only after all underwriting requirements have been reviewed. Your underwriter will call to discuss the offer.

Postpone: The medical condition has a specified stability period and may be considered at a later date.

Uninsurable: The medical condition is not acceptable.

Previously Declined Cases

In general, individuals who have been previously declined for long term care coverage are unlikely to qualify for coverage. Should an application be submitted for an individual who has been declined previously, it is required that a copy of the declination letter that provides the specific reason or reasons for the decline decision be submitted with the application.

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Height/Weight Chart

The height and weight charts are used for the purpose of assessing whether a person has an increased risk of morbidity. The following charts set forth MassMutual's guidelines for Males and for Females. Anyone outside the parameters listed on the following tables is considered a high risk for use of Long Term Care services and will be considered for coverage on an individual basis.

MALE BUILD CHART (WEIGHT IS IN POUNDS)

Height	Ultra Preferred	Select Preferred	Preferred
5'0	92-186	187-214	215-235
5'1	94-190	191-217	218-239

Medical Condition Guidelines

A

Abscess – *A localized collection of pus in any part of the body.*

- resolved or 6 months after surgeryULTRA PREFERRED
- brain or abdominal
 - present or surgery within 6 monthsPOSTPONE

Acoustic Neuroma – *A benign tumor that may develop in the hearing and balance nerves in the inner ear.*

- surgically removedULTRA PREFERRED
- presentUNINSURABLE

Addison’s Disease – *A severe hormonal deficiency of the adrenal gland.*

- well controlled on medicationSELECT PREFERRED

Adhesions

- post surgery, full recoveryULTRA PREFERRED

ADL (Activities of Daily Living) Deficits

- any mental or physical limitation in performing the activities of daily livingUNINSURABLE

Adult Day CareUNINSURABLE

AIDS (Acquired Immunodeficiency Syndrome)UNINSURABLE

Alcoholism – *A disease marked by excessive consumption of and dependence on alcoholic drinks.*

- recovered more than 5 years, in good healthSELECT PREFERRED
- recovered more than 3 years, in good healthPREFERRED
- within 3 years or with relapsesUNINSURABLE

Allergies and Hay FeverULTRA PREFERRED

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Alzheimer's Disease – *The deterioration of intellectual functions.*

-UNINSURABLE

Amaurosis Fugax – *A temporary, partial, or complete loss of vision.*

-UNINSURABLE

Amnesia – *Memory loss, sometimes including the memory of personal identity*

-UNINSURABLE

Amputation – *To cut off or remove usually through surgery a projecting body part.*

- due to trauma or congenital, independent, no ADL limitationsSELECT PREFERRED
- due to diseaseUNINSURABLE

Amyotrophic Lateral Sclerosis (Lou Gehrig's Disease) – *The degeneration of muscular activity within the brain and the spinal cord.*

-UNINSURABLE

Anemia – *A deficiency of red blood cells in the blood.*

- mildULTRA PREFERRED
- moderateSELECT PREFERRED
- severe or with complications or defined as AplasticUNINSURABLE

Aneurysm – *Abnormal expansion of a blood vessel.*

- abdominal or thoracic, 1 year after surgery with good recoverySELECT PREFERRED
- cerebral, with or without surgeryUNINSURABLE
- present or surgery within 1 yearPOSTPONE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Angina Pectoris – *Severe pain and constriction in region of the heart.*

- controlled on medicationsSELECT PREFERRED
- occasional episodes, or with history of myocardial infarctionSELECT PREFERRED
- with current (or within past 12 months) cigarette smokingUNINSURABLE

Angioplasty, Cardiac – *Repair of a blood vessel with a balloon or through a surgical procedure.*

- after 6 months, with or without medication . .SELECT PREFERRED
- with stent, after 6 months, with or without medicationSELECT PREFERRED
- with history of myocardial infarctionSELECT PREFERRED
- with current cigarette smoking, ongoing heart failureUNINSURABLE

Ankylosing Spondylitis – *Chronic inflammation of the spine and sacroiliac joints.*

- mildULTRA PREFERRED
- moderateSELECT PREFERRED
- with narcotic use or physical limitationsUNINSURABLE

Anxiety Disorder – *A state of apprehension, uneasiness, and fear.*

- situational with occasional medicationULTRA PREFERRED
- moderate with regular or multiple medicationsSELECT PREFERRED
- with hospitalization past 5 years or with functional impairmentUNINSURABLE

Aplastic Anemia

-UNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Arnold-Chiari Malformation – *A genetic disorder occurring in the lower portion of the brain in the cerebellum or brainstem. Ultimately affects balance, fine motor coordination, and unsteadiness in gait.*

- Type 1 only, surgically repaired, after 5 years, no residualsSELECT PREFERRED
- presentUNINSURABLE

Arrhythmias (other than Atrial Fibrillation) – *Irregular heartbeat.*

-SELECT PREFERRED

Arteriovenous Malformations (AVM) – *An abnormal collection of blood vessels.*

-UNINSURABLE

Arteritis – *Inflammation of an artery.*

- currently being treatedPOSTPONE
- off therapy more than 1 year, in remission ..SELECT PREFERRED

Arthritis (Degenerative or Osteoarthritis) – *The breakdown and deterioration of cartilage in the joints.*

- mild, asymptomatic, no treatment or occasional medicationULTRA PREFERRED
- moderate, with routine NSAID or joint injectionsSELECT PREFERRED
- significant, taking multiple medications, no physical limitationsPREFERRED
- with physical limitations, multiple joint replacements or surgery anticipatedUNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Arthritis (Rheumatoid) – *A chronic systemic disease marked by inflammatory changes in the joints.*

- mild, controlled with non-steroidal medications, no deformitiesSELECT PREFERRED
- moderate to severe, requiring multiple medicationsUNINSURABLE
- with physical limitations or surgery anticipated . .UNINSURABLE

Arthroscopy – *Examination of or joint surgery using an arthroscope.*

-ULTRA PREFERRED

Asbestosis – *A respiratory disease caused by inhaling asbestos fibers that can lead to breathing problems and heart failure.*

-UNINSURABLE

Assisted LivingUNINSURABLE

Asthma – *A disease of the respiratory system characterized by difficulty of breathing.*

- mild, seasonal, infrequent attacks with short term medication useULTRA PREFERRED
- moderate, controlled with medications (no steroids)SELECT PREFERRED
- severe, requiring multiple medications or steroids . . .PREFERRED
- with current (or within past 12 months) cigarette smokingUNINSURABLE

Atrial Fibrillation – *A severe, chaotic irregular heartbeat, which could lead to heart failure or strokes.*

- new onset, < 6 monthsPOSTPONE
- history of, successful cardioversion, normal sinus rhythmSELECT PREFERRED
- currently on anticoagulation medicationPREFERRED
- described as chronic, intermittent, or with multiple cardioversionsUNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Attention Deficit Disorder (ADD) and Attention Deficit Hyperactivity Disorder (ADHD) – *A persistent pattern of inattention and hyperactivity-impulsivity that occurs more frequently or severely than is typical.*

- stable, well controlled on single medication . . .ULTRA PREFERRED
- stable on more than 1 medicationSELECT PREFERRED

Autoimmune Disorders – *A person’s immune system begins to attack its own body, creating antibodies against its own tissue.*

-UNINSURABLE

Avascular Necrosis – *A disease resulting from loss of blood supply to the bones causing death of bone tissue and bone collapse.*

- mild, surgically corrected,SELECT PREFERRED

B

Back Pain

- mild, intermittent medication, no underlying disease processULTRA PREFERRED
- due to herniated disc (unoperated) or spinal disorderSELECT PREFERRED
- surgery anticipatedPOSTPONE

Barrett’s Esophagus – *A condition of the esophagus in which the normal tissue changes into abnormal tissue caused by recurrent reflux of gastric juices.*

- biopsy done within the last 2 years with favorable resultsSELECT PREFERRED

Basal Cell Skin Cancer

- completely excisedULTRA PREFERRED

Bell’s Palsy – *Temporary paralysis of the facial muscles*

- history of, complete recoveryULTRA PREFERRED

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Benign Prostatic Hypertrophy (BPH) – *An enlargement of the prostate.*

- PSA's normal, controlled with medication, no surgery anticipatedULTRA PREFERRED
- with surgery and full recoveryULTRA PREFERRED

Biliary Cirrhosis – *A liver disease that slowly destroys the bile ducts in the liver.*

-UNINSURABLE

Bi-Polar Disorder – *A mood disorder characterized by mood swings from mania (exaggerated feeling of well-being) to depression*

-UNINSURABLE

Bladder Infection – *Urinary*

- history of infection, complete recoveryULTRA PREFERRED
- chronic infections, without incontinenceSELECT PREFERRED

Bladder Prolapse (Cystocele) – *The dropping or sagging of a women's bladder due to the weakness of the bladder.*

- surgically repairedULTRA PREFERRED

Blood Pressure, Elevated – *A higher than normal blood pressure. (check list for cardiac medications)*

- mild and no other cardiac conditionULTRA PREFERRED
- in combination with other cardiac conditionSELECT PREFERRED
- poor medication compliance or not controlledUNINSURABLE

Brain Tumor – *Abnormal growth in or on the brain*

- after 5 years following removal, benign, no residualsPREFERRED
- all othersUNINSURABLE

Breast Disorders – *Any type of lump, swelling, cyst or mass that can be felt in the breast tissue.*

- fibrocystic diseaseULTRA PREFERRED

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Bronchiectasis – *A chronic expansion and destruction of the bronchi of the lungs, with secondary infection.*

- asymptomatic, non-cigarette smoker, minimum 1 year since diagnosis, normal pulmonary function testsPREFERRED
- chronic, with hospitalizationsUNINSURABLE

Bronchitis – *Acute or chronic inflammation of the bronchial tube.*

- acute attack, nonsmokerULTRA PREFERRED
- multiple attacks, smokerSELECT PREFERRED
- chronic, nonsmokerPREFERRED
- chronic, with current (or within past 12 months) cigarette smokingUNINSURABLE

Buerger’s Disease (*Thromboangiitis Obliterans*) – *A chronic, recurring, inflammatory, vascular disease of the peripheral arteries and veins.*

- currentUNINSURABLE
- full recoveryPREFERRED
- chronicUNINSURABLE

Bypass Surgery (*Heart*) – *A surgery that reroutes the blood supply by bypassing blocked arteries.*

- after 6 months, with good resultsSELECT PREFERRED
- with history of myocardial infarctionSELECT PREFERRED
- with current (or within past 12 months) cigarette smokingUNINSURABLE

C

Cancer – *An uncontrolled growth of abnormal cells which have mutated from normal tissue.*

Bladder

Early Stage 0 (in situ), 2 year from last treatmentULTRA PREFERRED

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Or recurrenceUNINSURABLE

Cane UseUNINSURABLE

Cardiomyopathy – *A disease that damages the heart muscle so that it loses its ability to pump blood and can cause irregular heartbeats.*

-UNINSURABLE

Carotid Artery Disease – *A constriction or narrowing of the arteries that supply the blood flow to the neck and brain.*

- nonsmoker, asymptomatic or corrected by endarterectomy, no history of TIA or strokeSELECT PREFERRED
- nonsmoker, asymptomatic, with other heart or circulatory disorderPREFERRED
- severe; symptomatic or cigarette smokerUNINSURABLE

Carpal Tunnel Syndrome – *A painful and progressive condition caused by compression of the median nerve.*

- successful surgery, no residualsULTRA PREFERRED
- surgery anticipated, with functional limitsPOSTPONE

Cataracts – *A clouding of the lens or the eye, which obstructs the passage of light.*

- recovered after surgeryULTRA PREFERRED
- present but not requiring surgery,
no visual impairmentULTRA PREFERRED
- surgery scheduled or anticipatedPOSTPONE

Catheter (current use; indwelling) *A tubular medical device for insertion into canals, vessels, or passageways to permit injection or withdrawal of fluids.*

-UNINSURABLE

Cerebral Palsy – *A disorder of movement and gait caused by brain damage.*

-UNINSURABLE

Cerebral Vascular Accident (CVA) – *The blood supply to a part of the brain is interrupted by an ischemic stroke or by a hemorrhagic stroke.*

-UNINSURABLE

Charcot-Marie-Tooth Disease – *A hereditary progressive neuromuscular disorder that primarily affects the feet, leg, and hands.*

-UNINSURABLE

Cholecystitis, Cholelithiasis (see Gallbladder) – *A sudden inflammation of the gallbladder that causes severe pain.*

Chronic Fatigue Syndrome – *A prolonged persistent fatigue that can be incapacitating and/or debilitating.*

- mild, controlled with medication, not affecting
functional abilitySELECT PREFERRED
- with depressionPREFERRED

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

- severe, with functional limitations;
use of steroids or narcoticsUNINSURABLE

Chronic Obstructive Pulmonary Disease (COPD) – *A severe disease of the lungs that obstructs the airways.*

- nonsmoker, controlled with 1-2 medications/inhalers, no hospitalizationsSELECT PREFERRED
- nonsmoker, controlled with 1-2 medications, occasional steroid use, no hospitalizationsPREFERRED
- with current (or within past 12 months) cigarette smoking, oxygen use, hospitalizations, daily steroid use, with heart or circulatory disordersUNINSURABLE

Cirrhosis, Liver – *The gradual loss of liver function due to cell damage and internal scarring.*

-UNINSURABLE

Cognitive Impairment – *The inability to mentally function normally, reduction in memory, thinking, and learning.*

-UNINSURABLE

Colitis – *A chronic, episodic, inflammatory disease of the large intestine and rectum characterized by bloody diarrhea.*

- controlled with medicationSELECT PREFERRED
- occasional flares, treated with steroids,
normal weightPREFERRED
- recurrent flares, hospitalizations, weight loss,
chronic steroidsUNINSURABLE

Collagen Vascular Disease – *Any disorder affecting the connective tissue, with rheumatic symptoms including muscle stiffness, soreness, and pain in the joints.*

-UNINSURABLE

Colostomy – *An opening of a portion of the colon through the abdominal wall.*

- 2 years after surgery, no complicationsSELECT PREFERRED

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Confusion

-UNINSURABLE

Congestive Heart Failure (CHF) – *The heart’s inability to maintain sufficient cardiac output to meet the body’s needs.*

- controlled with medications for 1 year, single event, ejection fraction >45%PREFERRED
- chronicUNINSURABLE

Connective Tissue Disease (see Collagen Vascular Disease)

Coronary Artery Disease – *A condition that reduces the blood flow through the coronary arteries to the heart muscle.*

- with angina or positive cardiac testSELECT PREFERRED
- with history of myocardial infarction or angioplastySELECT PREFERRED
- with current (or within past 12 months) cigarette smoking, or multiple heart attacksUNINSURABLE

CREST Syndrome (see Scleroderma)

Crohn’s Disease – *Inflammation and ulceration of the small intestine.*

- controlled with medicationSELECT PREFERRED
- occasional flares, treated with steroids, normal weightPREFERRED
- recurrent flares, hospitalizations, weight loss, chronic steroidsUNINSURABLE

Cushing’s Syndrome (due to Pituitary, Adrenal or Ectopic Tumors)

– *A hormonal disorder resulting from the overproduction of corticosteroid by the adrenal gland.*

- corrected by surgery, no complications or secondary disorders such as high blood pressure, osteoporosis or diabetesPREFERRED
- presentUNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

CVA (see Stroke)

Cystic Fibrosis – *An inherited disease characterized by chronic lung infections and an inability to absorb fats or other nutrients from foods.*

-UNINSURABLE

Cystitis – *Inflammation of the urinary bladder.*

- acuteULTRA PREFERRED

D

Degenerative Joint Disease (see Arthritis)

Dementia – *A cognitive deficit including memory impairment.*

- all formsUNINSURABLE

Demyelinating Disease – *Causing or characterized by the loss or destruction of myelin (the sheath around nerve fibers), such as multiple sclerosis.*

-UNINSURABLE

Depression – *A mental disorder marked by sadness, inactivity, difficulty with thinking and concentration, feelings of helplessness and worthlessness.*

- mild, situational or treated with occasional, regular, or multiple medicationSELECT PREFERRED
- chronic with multiple medications, hospitalizationsUNINSURABLE

Dermatomyositis – *An autoimmune disorder in which the muscles and skin become inflamed, causing weakness of the muscles and a skin rash.*

-UNINSURABLE

Diabetes Mellitus, Insulin Dependent – *A chronic disease of carbohydrate metabolism in which the body makes little or no insulin, requiring daily injections of insulin to sustain life.*

-UNINSURABLE

Diabetes Mellitus, Non-Insulin Dependent (diet or oral medications) – *A chronic disease of carbohydrate metabolism, marked by high blood sugar and sugar in urine, resulting from inadequate*

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

production or use of insulin.

- newly diagnosed or change in medications < 1 year . . .POSTPONE
- diet or oral medication controlSELECT PREFERRED
- diet or medication control, overweight,PREFERRED
- poor control or with other serious health conditions, diabetic complications, cigarette smoker or smoker within past 12 monthsUNINSURABLE

Dialysis, Kidney – *A procedure to remove the waste products from the blood and excess fluid from the body as a treatment for kidney failure.*

-UNINSURABLE

Diverticulitis, Diverticulosis (see Irritable Bowel Syndrome) – *Diverticulitis is inflammation and perforation of a diverticulum (an abnormal pouch or sac of the intestine), Diverticulosis is a condition where small sacs of the inner lining of the intestine are present.*

Down’s Syndrome – *A chromosome abnormality resulting in moderate to severe mental retardation and other abnormalities*

-UNINSURABLE

Drug Dependency or Abuse

- after 5 years, complete abstinence including alcoholSELECT PREFERRED
- after 3 years, complete abstinence including alcoholPREFERRED
- within 3 years or with relapsesUNINSURABLE

Duodenal Ulcer – *A peptic ulcer situated in the small intestines.*

- history of, occasional medicationULTRA PREFERRED
- chronic, frequent flare ups and/or bleeding . . .SELECT PREFERRED
- surgery anticipated or scheduledPOSTPONE

Dupuytren’s Contracture – *A painless thickening and contracture of tissue beneath the skin on the palm of the hand.*

- present or surgically corrected, no functional

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

limitations or other disease presentULTRA PREFERRED

- surgery anticipated or scheduledPOSTPONE

E

Emphysema (*see Chronic Obstructive Pulmonary Disease*)

Enderterectomy (*see Carotid Artery Disease*) – *surgery to remove or bypass fatty deposits or blockage in an artery.*

Endocarditis – *Inflammation of the inner lining of the heart.*

- fully recovered > 6 months, 1 episode, no residualsSELECT REFERRED
- recurrentUNINSURABLE

Epilepsy (Seizures) – *Transient neurological abnormalities caused by abnormal electric activity in the brain.*

- controlled on medication, seizure free > 12 monthsSELECT PREFERRED
- seizure within 1 year; poor control or cause unknownUNINSURABLE

Epstein-Barr Syndrome – *A herpes virus that causes infectious mononucleosis.*

- 6 months after full recovery, no residualsULTRA PREFERRED
- current evaluation or work upPOSTPONE

Esophageal Varices – *Twisted, expanded areas in the esophageal veins resulting from portal hypertension caused by advanced liver disease.*

-UNINSURABLE

Esophagitis – *Inflammation of the esophagus.*

- mild, well controlled by diet or medicationULTRA PREFERRED
- recurrent or with bleedingSELECT PREFERRED

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

F

Falls

- multiple (3) with or without injury in past 5 years .UNINSURABLE

Fatty Liver – *Accumulation of excess fat in the liver cells. Some causes are obesity, high triglycerides and alcohol use.*

- liver function tests normal, stableSELECT PREFERRED
- abnormal liver function tests or related to alcohol intakeUNINSURABLE

Fibrocystic Breast Disease – *A benign breast lump characterized by cysts and thickening of the milk glands.*

-ULTRA PREFERRED

Fibromyalgia – *A chronic disorder of the muscles and related soft tissue including ligaments and tendons, characterized by muscle pain, fatigue, and sleep disturbances.*

- mild, controlled with minimal medication, no limitationsSELECT PREFERRED
- with chronic fatigue, weakness, functional limitations; use of steroids or narcoticsUNINSURABLE

Fractures

- arm, due to trauma, no functional impairment, full recoveryULTRA PREFERRED
- leg, due to trauma, no functional impairment, full recoveryULTRA PREFERRED
- pelvis, due to trauma, no functional impairmentSELECT PREFERRED
- Vertebral, due to trauma, no functional limitsSELECT PREFERRED
- Vertebral, due to osteoporosisUNINSURABLE
- Paget’s diseaseUNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Fuch's Corneal Dystrophy – *A gradual deterioration of one layer or another of the cornea, which causes clouding and blurred vision.*

-UNINSURABLE

G

Gallbladder (*Cholecystitis, Cholelithiasis*) – *A sudden inflammation of the gallbladder that causes severe pain.*

- medically managedULTRA PREFERRED
- after 3 months surgeryULTRA PREFERRED
- pending or anticipated surgeryPOSTPONE

Gastric Bypass Surgery (*Stapling, Banding*) – *Surgery to promote weight loss by reducing the size of the stomach and/or interrupting the digestive process.*

- after 6 months, must use weight at time of surgerySEE BUILD CHART
- after 24 months, use current weightCHART

Gastroesophageal Reflux Disease (*GERD*) – *Regurgitation of gastric juices into the lower esophagus.*

- well controlled by diet or medicationULTRA PREFERRED
- recurrent symptoms or flare upsSELECT PREFERRED

Gilbert's Disease (*confirmed diagnosis*) – *An inherited disorder that affects the way bilirubin is processed by the liver.*

-ULTRA PREFERRED

Glaucoma – *A group of eye diseases that cause damage to the optic nerve which lead to blindness.*

- treated with eyes drops, no visual impairmentULTRA PREFERRED
- with progressive visual lossUNINSURABLE

Goiter – *An enlargement of the thyroid gland.*

- post surgery or post radioactive iodine treatment, benign, on thyroid replacementULTRA PREFERRED

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Gout – *Recurrent inflammation of the peripheral joints, which may become chronic and cause joint deformity.*

- controlled with medication, no flare upULTRA PREFERRED
- with recurrent flare ups,SELECT PREFERRED

Graves' Disease – *An autoimmune disease that causes over activity of the thyroid gland.*

- controlled by medicationULTRA PREFERRED

Guillian-Barre Syndrome – *A disorder in which the body's immune system attacks the peripheral nerves, which are outside the brain and spinal cord.*

- full recovery after 12 months, no residuals or functional limitationsSELECT PREFERRED
- full recovery with minimal residuals after 12 months, no functional limitationsPREFERRED

H

Hashimoto's Thyroiditis – *An inflammation of the thyroid gland, that frequently results in hypothyroidism (low thyroid).*

- controlled by thyroid replacement therapy . . .ULTRA PREFERRED

Headaches – *Diffuse pain in different portions of the head, not confined to any nerve distribution area.*

- occasional medicationULTRA PREFERRED

Heart Attack – *Insufficient blood supply to the heart muscle.*

- after 6 months, single attack, 1-2 medications, stable and fully functionalSELECT PREFERRED
- after 12 months, second or multiple attacks, 1-2 medications, stable, fully functionalPREFERRED
- with chronic angina (chest pain)PREFERRED
- current cigarette smoker or smoker within past 12 monthsUNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Heart Blocks – *A condition in which the signal from the heart’s upper to lower chambers is impaired or doesn’t transmit.*

- left bundle branch block with normal stress test, echoSELECT PREFERRED
- right bundle branch block with normal stress test, echoULTRA PREFERRED
- First-degree AV Block, asymptomatic, treatment free, no underlying cardiac conditionsULTRA PREFERRED
- Second-degree AV Block, asymptomatic, no underlying cardiac conditionsULTRA PREFERRED
- Third-degree AV Block, asymptomatic, medically treated or with successful pacemaker implant, with known heart disease, after 12 monthsPREFERRED

Heart Valve Disease with Replacement – *A surgery used to repair or replace diseased heart valves.*

- after 6 monthsSELECT PREFERRED
- surgery scheduled or anticipatedPOSTPONE

Hemochromatosis/Hemosiderosis – *A disorder that causes the body to absorb excess iron, which accumulates in the liver, pancreas, heart, and in other organs.*

-UNINSURABLE

Hemophilia – *An inherited disorder in which a person’s blood lacks a certain protein important in forming blood clots, leading to excessive bleeding.*

-UNINSURABLE

Hemorrhoids – *A mass of dilated veins in swollen tissue at the margin of the anus or nearby within the rectum. Also known as piles.*

-ULTRA PREFERRED

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Hepatitis (A & B) – *An inflammation of the liver caused by viruses, bacteria, parasites, and toxic reactions to drugs, alcohol, and chemicals.*

- hepatitis A, full recovery (3 months), normal liver function testsULTRA PREFERRED
- hepatitis B, full recovery (12 months), normal liver function testsSELECT PREFERRED
- described as active, chronic active, or due to alcoholUNINSURABLE

Hepatitis C - *The most serious hepatitis virus and the leading cause of chronic hepatitis, end stage liver disease, liver cancer and liver transplants in the US. The C virus is transmitted primarily by blood or blood products. Typically due to IV transfusion, past organ transplant, illegal drug use, or occupationally (health care workers who have had accidental needle sticks with infected blood).*

- acute infection, after 1 year, considered recovered (virus cleared), no virus detectable, no illegal drug use history, normal liver biopsy and normal liver function testsSELECT PREFERRED
- all othersUNINSURABLE

Herniated Disc – *A rupture of an intervertebral disc of the spine with a protrusion of the disc’s core into the spinal canal.*

- post surgery with good recoveryULTRA PREFERRED
- present, no surgery plannedSELECT PREFERRED
- surgery anticipated or scheduledPOSTPONE

Hiatal Hernia – *A portion of the stomach protrudes upward into the chest through an opening in the diaphragm.*

- with or without surgery, controlled by diet or medicationULTRA PREFERRED

Hip Replacement (see Joint Replacement)

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

HIV Positive

-UNINSURABLE

Hodgkin’s Lymphoma – *A malignant growth of cells in the lymph system*

- after 10 years, complete remissionPREFERRED

Home Care Service

- within the last 12 monthsPOSTPONE

Huntington’s Chorea – *A genetic disease that involves the degeneration of the basal ganglia of the brain.*

-UNINSURABLE

Hydrocephalus – *A disorder characterized by an excessive amount of cerebrospinal fluid under pressure within the skull.*

-UNINSURABLE

Hypercholesterolemia (high cholesterol)ULTRA PREFERRED

Hyperglycemia – *a condition in which an excessive amount of sugar circulates in the blood.*

-SELECT PREFERRED

Hyperparathyroidism – *The over activity of the parathyroid glands that leads to an abnormally elevated level of calcium in the blood.*

- surgically corrected, normal calcium, no limitationsULTRA PREFERRED
- minimally elevated calcium levels, stable, closely monitored, no related disorders such as high blood pressure, impaired renal function, or bone demineralizationSELECT PREFERRED

Hypertension (see Blood Pressure, elevated)

Hyperthyroidism – *The over activity of the thyroid gland which results in the over production of thyroid hormone.*

- controlled with medicationULTRA PREFERRED

Hypothyroidism – *The under activity of the thyroid gland which results in the under production of thyroid hormone.*

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

- controlled with medicationULTRA PREFERRED

Hysterectomy – *the surgical removal of the uterus.*

- after 3 months, no complications
or malignancyULTRA PREFERRED

I

Ileostomy (see Colostomy) – *The creation of a surgical passage through the abdominal wall into the ileum.*

Incontinence, Bowel – *The inability of the body to control the evacuative functions.*

- surgically correctedULTRA PREFERRED
- all othersUNINSURABLE

Incontinence, Urinary – *The inability of the body to control the evacuative functions.*

- stress or urge, treated with 1 medicationULTRA PREFERRED
- treated with surgery, full recoveryULTRA PREFERRED
- complete loss of controlUNINSURABLE

Intestinal Obstruction – *A partial or complete blockage of the bowel that results in the failure of the intestinal contents to pass through.*

- surgically corrected after 12 months,
no residualsULTRA PREFERRED
- surgery anticipated or scheduledPOSTPONE

Irritable Bowel Syndrome – *A form of colitis, which is characterized by constipation and diarrhea.*

- controlled with medication,
no surgery anticipatedULTRA PREFERRED
- frequent flare ups and/or bleedingSELECT PREFERRED

ITP (Idiopathic Thrombocytopenic Purpura) – *A bleeding disorder that is caused by too few platelets in the blood.*

-UNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

J

Joint Replacement (*Knee or Hip*) – *The replacement of a joint.*

- one or both joints, after 6 months,
no functional limitations,SELECT PREFERRED
- surgery anticipated or scheduledPOSTPONE

K

Kidney Dialysis (*see Dialysis*) – *The build up of waste and toxins, which are not filtered out of the blood and start to accumulate in the tissues.*

Kidney Failure – *Failure of the kidney to perform its essential functions.*

-UNINSURABLE

Kidney Infection – *An infection of the kidney and the ducts that carry urine away from the kidney.*

- no current treatment, fully recoveredULTRA PREFERRED
- currently under treatment,
medically managedSELECT PREFERRED

Kidney Stones (*Nephrolithiasis*) – *renal calculi or nephrolithiasis. Solid lump made up of crystals that separate from the urine.*

- no current treatment, resolvedULTRA PREFERRED

Kidney Transplant – *A surgical procedure to implant a healthy kidney into a patient with kidney failure.*

- 5 years after transplant, normal renal function tests,
no complicationsPREFERRED (No HCBS)

Knee Replacement (*see Joint Replacement*) – *The replacement of a knee*

L

Labyrinthitis – *An inflammation of the fluid filled chambers in the inner ear that sense balance, resulting in vertigo.*

- well controlled with occasional medication . . .ULTRA PREFERRED
- well controlled on 1-2 medicationsSELECT PREFERRED

Lacunar Infarct (see Stroke)– *An area of tissue in the brain that undergoes death of cells following the cessation of blood supply, resulting from occlusion or stenosis of the supplying artery.*

Lambert-Eaton Syndrome (Myasthenia Syndrome)– *A condition marked by neuropathy and weakness of the limbs.*

-UNINSURABLE

Left bundle branch block (see Heart Blocks)– *A defect in the hearts electrical conduction system.*

Leukemia (any type)– *A group of bone marrow cancers in which white blood cells divide uncontrollably, affecting the production of normal white blood cells, red blood cells and platelets.*

-UNINSURABLE

Liver Cyst

- 1-2 cysts, no liver diseaseULTRA PREFERRED
- multiple cysts, no kidney or liver diseaseSELECT PREFERRED

Lou Gehrig’s Disease (see Amyotrophic Lateral Sclerosis)– *The degeneration of muscular activity within the brain and the spinal cord.*

Lung Cancer (see Cancer)

Lupus (Discoid)– *A chronic disease of the skin characterized by remissions and exacerbation of a scaling, red, macular rash.*

- stable after 12 months, negative ANAULTRA PREFERRED

Lupus Erythematosus (Systemic)– *A chronic, inflammatory auto immune disorder that may affect organ systems including the skin, joints, and internal organs.*

-UNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Lyme's Disease – *A bacterium that is transmitted by a tick and characterized by skin changes, flu like symptoms and joint inflammation.*

- correct diagnosis, adequate treatment, no residual, after 3 monthsULTRA PREFERRED
- correct diagnosis, adequate treatment, with residuals but full recoverySELECT PREFERRED
- questionable diagnosis or current treatmentPOSTPONE

Lymphoma (see Cancer) – *A form of cancer a malignant tumor of the lymphoid tissue.*

M

Macular Degeneration – *A deterioration of the central portion of the retina, affecting central vision and visualization of fine details.*

- no functional limits, successful adaptation to any visual lossSELECT PREFERRED
- progressive visual loss, changes to lifestyle to accommodate vision lossUNINSURABLE

Major Depression – *An emotional state characterized by feelings of persistent sadness, worthlessness, rejection, loss of hope, and loss of interest in usual activities.*

-UNINSURABLE

Manic Depression (see Bipolar)

Marfan's Syndrome – *An inheritable disorder of connective tissue that affects the skeletal system, cardiovascular system, eyes, and skin.*

-UNINSURABLE

Medicaid Recipient

-UNINSURABLE

Melanoma (see Cancer) – *A malignant skin tumor containing dark pigment.*

Memory Loss/Problems – *A loss of the ability to memorize information or recall information stored in the brain.*

-UNINSURABLE

Meniere’s Disease – *An inner ear disorder, usually accompanied by varying degrees of hearing loss, ringing in the ears, and dizziness.*

- adequately diagnosed by MRI, controlled with occasional medication, after 6 monthsULTRA PREFERRED
- diagnosis made by symptoms only, not diagnosed by MRI, regular medication, after 6 monthsSELECT PREFERRED
- uncontrolled with ongoing symptomsUNINSURABLE

Menopausal Symptoms (Pre/Post)

- adequately diagnosed, controlled with 1 depression medication in lieu of hormone replacement therapyULTRA PREFERRED

Mental Retardation – *A condition characterized by impaired intellectual function which interferes with the ability to cope in everyday activities.*

-UNINSURABLE

Migraine Headaches – *A severe, sometimes incapacitating headache, which can be accompanied by visual changes or stomach disturbances.*

- uncomplicated, controlled with occasional medicationULTRA PREFERRED
- described as complicated,uncontrolled or with chronic pain and limitationsUNINSURABLE

Mitral Valve Prolapse – *A condition, in which the mitral valve in the heart is deformed, causing a degree of leakage and is characterized by a heart murmur and sometimes chest pain.*

- no symptoms, normal EKG, may or may not take antibiotic for prophylactic reasonsULTRA PREFERRED
- symptomatic or with other heart condition ..SELECT PREFERRED

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Monoclonal Gammopathy – *A disorder of the blood in which most of the protein produced is from one antibody instead of from many.*

-UNINSURABLE

Multiple Myeloma – *a malignancy of plasma cells derived from B-lymphocytes.*

-UNINSURABLE

Multiple Sclerosis – *A progressive disease of the central nervous system in which the protective covering of nerve fibers in the brain or spinal cord is destroyed.*

-UNINSURABLE

Muscular Dystrophy – *A slow, progressive disease characterized by degeneration of muscle fibers.*

-UNINSURABLE

Myasthenia Gravis – *An autoimmune disorder in which the muscles become weak and tire easily.*

-UNINSURABLE

Myasthenia Syndrome (see Lambert-Eaton Syndrome)

Myocardial Infarction (see Heart Attack) – *Insufficient blood supply to the heart muscle.*

Myocarditis – *An inflammation of the heart muscle, which is due to a viral infection.*

- acute, full recovery, not related to any other health conditionULTRA PREFERRED

N

Narcolepsy – *A rare syndrome of recurrent attacks of sleep, sudden loss of muscle tone and sleep paralysis.*

- well controlled, no functional limitationsSELECT PREFERRED
- with disability or hospitalizationsUNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Nephrectomy (removal of one kidney only)

- after 6 months, normal labs and kidney testsULTRA PREFERRED
- due to disease or unhealthy remaining kidney ...UNINSURABLE

Nephrolithiasis (see Kidney Stones)

Nephrosclerosis – A kidney disorder in which the smallest arteries in the kidneys are damaged.

-UNINSURABLE

Neurofibromatosis – A genetic disorder of the nervous system that causes tumors to form on the nerves anywhere in the body at any time.

-UNINSURABLE

Neurogenic Bladder – A urinary problem in which there is abnormal emptying of the bladder with subsequent retention or incontinence of urine.

-UNINSURABLE

Neuropathy – An abnormal and degenerative state of the nervous system or nerves.

- mild, non progressive, no functional limitationsPREFERRED
- Progressive symptoms OR Requires adaptive devices or assistance with Activities, OR History of Falls OR Balance problem when walking OR under current evaluation
.....UNINSURABLE

Nursing Home Confinement

- within the last yearPOSTPONE

0

Obsessive compulsive disorder (OCD) – A disorder characterized by repetitive thoughts and behaviors.

- well controlled with good ongoing treatmentSELECT PREFERRED

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Organ Transplant (except Kidney) – *The replacement of a diseased organ with a healthy one.*

-UNINSURABLE

Organic Brain Syndrome – *A disturbance of mental functioning due to a physical cause as opposed to a psychological cause.*

-UNINSURABLE

Osteomyelitis – *An acute or chronic bone infection caused by bacteria.*

- acute with complete recovery after 6 monthsSELECT PREFERRED
- chronic or active or with functional limitations ...UNINSURABLE

Osteoporosis – *A reduction of bone mass, causing bones to become brittle, fragile, and susceptible to fractures.*

- mild, on medication, no history of fracture ...SELECT PREFERRED
- with fracture historyUNINSURABLE

Oxygen

- current useUNINSURABLE

P

Pacemaker – *An electrical device that can control the beating of the heart by a series of rhythmic electrical discharges.*

- no complicationsSELECT PREFERRED

Paget’s Disease – *A disruption of normal bone formation causing the affected bones to weaken, thicken, and become deformed.*

- if discovered on x-ray, no symptoms or fracturesSELECT PREFERRED
- with fracture historyPREFERRED
- with severe joint deformity or painUNINSURABLE

Panic Disorder – *Panic disorder is characterized by recurrent panic attacks (i.e., periods of intense fear and discomfort) on an unpredictable basis.*

- medication as neededULTRA PREFERRED
- routine or daily medication takenSELECT PREFERRED
- with prior hospitalization(s) or disabilityUNINSURABLE

Pancreatitis – *An inflammation of the pancreas.*

- single episode, no residual, complete recovery after 6 monthsULTRA PREFERRED
- Chronic or with multiple episodes or due to alcoholUNINSURABLE

Paralysis (all forms) – *A complete or partial loss of controlled movement caused by an inability to contract one or more muscles.*

-UNINSURABLE

Parkinson’s Disease – *A chronic progressive nervous disease marked by tremor, muscular weakness, rigidity and peculiar gait.*

-UNINSURABLE

Pericarditis – *A disorder caused by inflammation of the pericardium, which is the sac like covering of the heart.*

- acute, full recovery, no other cardiac or related health conditionULTRA PREFERRED

Peripheral Neuropathy – *A disease or degenerative state of the peripheral nerves marked by muscle weakness, atrophy, pain and numbness.*

- if caused by nerve root compressionPREFERRED
- if caused by diseaseUNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Peripheral Vascular Disease – *A disease of the blood vessels characterized by narrowing and hardening of the arteries that supply the legs and feet, causing a decrease in blood flow that can injure nerves and other tissues.*

-UNINSURABLE

Phlebitis – *Painful inflammation of a vein.*

- single attack, fully recovered
after 3 monthsULTRA PREFERRED

Physical Therapy

- within the last 6 monthsPOSTPONE

Pick’s Disease – *A rare degenerative brain illness that causes dementia and is marked by progressive impairment of intellect and judgment.*

-UNINSURABLE

Pituitary Tumor, benign (see Brain tumor)

Polio – *A virus which invades the central nervous system marked by tremor, muscle pain, muscle weakness, stiffness, serious breathing problems, or death.*

- history of, with full function,
no past paralysisULTRA PREFERRED
- history of paralysis, now with full function . . .SELECT PREFERRED
- with post polio syndrome or with
current residual paralysisUNINSURABLE

Polycystic Kidney Disease – *An inherited disease characterized by the growth of numerous cysts filled with fluid in the kidneys.*

-UNINSURABLE

Polycythemia – *A blood disease with abnormal increase in red and white blood cells and platelets.*

-UNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Polymyalgia Rheumatica – *An inflammatory syndrome, which is marked by pain and stiffness in the muscles of the hips, thighs, shoulders and neck.*

- No symptoms and controlled with medication, in remission, No ongoing steroid use, No functional limitsSELECT PREFERRED
- controlled with low dose steroid medicationsPREFERRED
- with symptoms, frequent narcotic use, with functional limitationsUNINSURABLE

Polyps – *A tumor, which is commonly found in vascular organs such as the nose, uterus, colon, and rectum.*

- surgically removed, benignULTRA PREFERRED
- malignantSee Cancer

Post Traumatic Stress disorder – *A psychiatric disorder that can occur following a traumatic experience, a life threatening, or extremely distressing situation that causes a person to feel intense fear, horror or a sense of helplessness.*

-UNINSURABLE

Prostate Cancer (see Cancer)

Prostate Enlargement

- benign prostate hypertrophy (BPH), with or without surgeryULTRA PREFERRED

PSA (Elevated) (Prostate-Specific Antigen) – *An enzyme that is produced by the prostate gland that can be measured in the blood.*

- Elevated, proven benign by biopsy, BPH treated with 1 medication or no medicationsULTRA PREFERRED
- if rising, not within normal limits for age or not proven benignUNINSURABLE
- elevated, no biopsy done, monitoringPOSTPONE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Psoriatic Arthritis – *Pain and swelling of joints with patches of scaly skin related to psoriasis.*

- no functional limits, no joint deformities, treated with 1 medication (not steroids)SELECT PREFERRED
- moderate impairment, no functional limits, treated with steroids, Methotrexate, Embrel, Plaquenil or similar medicationsPREFERRED
- severe joint deformity, ongoing pain, treated with narcotics, with functional limitationsUNINSURABLE

Psychosis – *A severe mental disorder in which the individual loses contact with reality.*

-UNINSURABLE

Pulmonary Embolism – *A blockage in an artery in the lungs caused by a blood clot that travels through the blood vessels to the lungs.*

- one occurrence, no complications, off all blood thinnersSELECT PREFERRED
- recurrent, multipleUNINSURABLE

Pulmonary Fibrosis – *Scarring or thickening of tissues deep in the lung usually resulting from previous lung inflammation such as pneumonia, or tuberculosis.*

-UNINSURABLE

R

Raynaud’s Disease – *A disorder of the small blood vessels of the extremities, is characterized by intermittent pallor, blanching and coldness of the affected parts.*

- mild, non-progressive, with or without medicationsSELECT PREFERRED
- progressive or with functional limitationsUNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Raynaud’s Phenomenon – *A circulatory disorder with similar signs and symptoms of Raynaud’s disease.*

-SELECT PREFERRED
- due to serious underlying diseaseUNINSURABLE

Reflex Sympathetic Dystrophy – *A chronic pain condition that is the result of dysfunction in the central or peripheral nervous system.*

- Current, mild degree of impairment, no functional limitationsSELECT PREFERRED

Renal Failure – *A gradual and progressive loss of the ability of the kidneys to excrete waste, concentrate urine, and conserve electrolytes.*

- currentUNINSURABLE
- acute, after 1 year, fully recovered, no residualsSELECT PREFERRED
- chronic renal insufficiencyPREFERRED

Renal Insufficiency (not chronic) – *Insufficient excretion of wastes by the kidneys.*

- after 12 months, stableSELECT PREFERRED

Restless Leg Syndrome – *A neurological disorder characterized by unpleasant sensations in the legs and an uncontrollable desire to move them.*

- controlled on one medicationSELECT PREFERRED
- multiple medications or use of anti-Parkinson’s medicationsPREFERRED

Retinal Artery Occlusion – *A blockage of the main artery leading to the retina or one of its branches.*

- after 2 yearsPREFERRED
- within 2 years or multiple episodesUNINSURABLE

Retinitis Pigmentosa – *A condition characterized by a degeneration of the rods and cones of the retina of the eye, which leads to blindness.*

-UNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Retinopathy (Diabetic) – A disease of the retina due to diabetes that can cause decreased vision and blindness.

-UNINSURABLE

Rheumatoid Arthritis (see Arthritis) – A chronic systemic disease marked by inflammatory changes in the joints.

S

Sarcoidosis – A chronic multisystem disease of unknown cause characterized by inflammatory cells, called granulomas that can produce many different symptoms.

- no progression for at least 1 year, mild symptoms, no treatment, non-cigarette smokerSELECT PREFERRED
- with current (or within past 12 months) cigarette smoking or progressiveUNINSURABLE

Schizophrenia – A mental disorder that makes it difficult to tell the difference between real and imagined experiences, to think logically, or to behave appropriately in social situations.

-UNINSURABLE

Scleroderma (Crest Syndrome) – An autoimmune disorder of the connective tissue, which is characterized by formation of scar tissue in the skin and organs of the body.

-UNINSURABLE

Scoliosis – A crookedness or lateral curvature of the spine.

- mild, no functional limitationsULTRA PREFERRED
- severe but without physical limitationsSELECT PREFERRED

Seizure Disorder (see Epilepsy)

Self-Reported Memory Concerns

- current or within 5 yearsUNINSURABLE

Shunts (*Brain, Heart or Kidney*) – *A normal or abnormal passage by which bodily fluid is diverted from one channel, circulatory path, or part to another.*

-UNINSURABLE

Shy-Drager Syndrome – *A degenerative disease characterized by progressive damage to the autonomic nervous system, muscle tremor, rigidity, and slow movement.*

-UNINSURABLE

Sickle Cell Anemia – *A hereditary disorder in which the red blood cells contain an abnormal hemoglobin (protein carried by red cells), which results in blood cells shaped like sickles.*

-UNINSURABLE

Sjogren’s Syndrome – *A chronic disease in which white blood cells attack the moisture producing glands, but it is a systemic disease, affecting many organs and may cause fatigue.*

- mild, no limitationsSELECT PREFERRED
- with disability or physical limitationsUNINSURABLE

Skin Cancer (*not Melanoma*) – *Cancer that may arise on the surface of the body and form a small ulcer or pimple.*

- external, basal or squamous cell cancerULTRA PREFERRED

Sleep Apnea – *A breathing disorder characterized by brief interruptions of breathing during sleep.*

- Operated, Complete Recovery, No cardiac disease, NonsmokerULTRA PREFERRED
- mild or currently using CPAPSELECT PREFERRED
- with cardiac disorder and/or overweightPREFERRED

Smoking Cigarettes

- without medical problemsSELECT PREFERRED
- with chronic upper respiratory infectionsPREFERRED
- with diabetes, heart or lung diseaseUNINSURABLE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

7Spinal Stenosis – *A narrowing of the space in the spinal canal through which nerves run.*

- mild, non-progressiveSELECT PREFERRED
- mild, multiple medications required,
no functional limitationsPREFERRED

Splenectomy – *Surgical removal of the spleen due to trauma or disease.*

- fully recoveredULTRA PREFERRED

Stent (cardiac) – *A short or narrow metal plastic tube that is inserted into an artery or bile duct to keep a previously blocked passageway open.*

- after 6 months, with good resultsSELECT PREFERRED

Stroke – *A loss of brain functions caused by a loss of blood circulation to areas of the brain.*

-UNINSURABLE

Subarachnoid Hemorrhage – *A disorder in which blood from a ruptured blood vessel spreads over the surface of the brain.*

-UNINSURABLE

Subclavian Steal Syndrome – *A condition characterized by recurrent attacks of blurred or double vision, dizziness and loss of coordination caused by reduced blood flow to the base of the brain.*

-UNINSURABLE

Subdural Hematoma – *A collection of blood between the surface of the brain and its outer covering.*

- within 2 yearsPOSTPONE
- after 2 years, no residualsSELECT PREFERRED

Suicide Attempt – *The unsuccessful act of ending one’s own life.*

- allUNINSURABLE

Surgery AnticipatedPOSTPONE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

T

Temporal Arteritis – *A chronic inflammation of large arteries, typically of the temporal artery, an artery on the side of the scalp.*

- 1 year after recoverySELECT PREFERRED
- in remission, currently taking Prednisone or other steroid medicationPREFERRED

Temporomandibular Joint Syndrome (TMJ) – *A dysfunction or alteration of the temporomandibular joint, which is the joint that allows jaw mobility.*

-ULTRA PREFERRED

Thrombocythemia (elevated blood platelets)UNINSURABLE

Thrombocytopenic Purpura (low blood platelets) . .UNINSURABLE

TIA (Transient Ischemic Attack) – *A brief interruption of the blood supply to a part of the brain.*

-UNINSURABLE

Transverse Myelitis – *A rare neurological disorder characterized by inflammation of the spinal cord.*

-UNINSURABLE

Tremors – *Involuntary movements in the muscles of the hands, arms, and head but can affect the legs.*

- Benign, Essential, Intention or Familial, Must be stable for 6 months with no progression and normal neurological ExamSELECT PREFERRED

U - Z

Ulcers (Duodenal or Peptic) – *An erosion of the inner lining of the stomach usually caused by gastric acid and pepsin.*

- history of, occasional medicationULTRA PREFERRED
- chronic, frequent flare ups and/or bleeding . .SELECT PREFERRED
- surgery scheduledPOSTPONE

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.

Varicose Veins – *Enlarged, twisted, painful superficial veins resulting from poorly functioning valves.*

- uncomplicated, without medicationULTRA PREFERRED
- medication required or with skin ulcersSELECT PREFERRED
- with FUNCTIONAL LIMITATIONS or other complications
UNINSURABLE

Vertebral Basilar Insufficiency – *A condition in which blood flow to the vertebral arteries is restricted or insufficient.*

-UNINSURABLE

Vertigo – *A type of dizziness that is characterized by the sensation of spinning.*

- controlled with medicationSELECT PREFERRED
- not controlledUNINSURABLE

Von Willebrand’s Disease – *An inherited disorder of the blood, which leads to abnormal bleeding.*

-UNINSURABLE

Waldenstrom’s Disease – *Excessive production of red blood cells, white blood cells, and platelets in the bone marrow.*

-UNINSURABLE

Wilson’s Disease – *An inherited disorder in which excessive amounts of copper accumulate in the body.*

-UNINSURABLE

Wolf-Parkinson-White Syndrome – *An abnormal heart rhythm causing increased heart rate.*

- asymptomatic, no medication, and/or successfully treated by radiofrequency ablationULTRA PREFERRED
- episodes of tachycardia or treated with medicationSELECT PREFERRED

FOR PRODUCER USE ONLY. NOT FOR USE WITH THE PUBLIC.
